

## Changing Personal Settings (Passwords, E-mail, Username)

Our new Online Banking product allows you to change your password, e-mail, username, or password reset question/answer. This short tutorial will show you where to go to do this!

First, once logged in, you will choose “Settings”

Once you click on "Settings" you will see the following screen:

The screenshot shows a web interface with a navigation bar at the top containing 'Personal', 'Account', 'Display', and 'ATM/Debit Card'. Below this is a blue header for 'Modify Personal Settings' with a help icon. The form includes fields for 'Current Email Address', 'Change Email Address', 'Reenter New Email Address', 'Password Reset Question' (with the text 'What is my favorite color?'), and 'Password Reset Answer'. A 'Personal Watermark' section shows a giraffe image and a note: 'NOTE: Click on Watermark to change.' Below this is a blue header for 'Modify Login Information'. This section contains fields for 'NetTeller ID', 'Enter New', 'NetTeller Password', 'Enter Current', 'Enter New', and 'Enter New Again'. A blue 'Submit' button is located at the bottom right of the form.

On this screen you can change your e-mail address, change your password reset question and/or answer, change your personal watermark, user ID (which is called your NetTeller ID here) as well as your password.

Please make sure that you click Submit after any changes so that they will take effect!
